

**We the undersigned, call on the Leicestershire Local Government Pension Fund (LLGPS) committee to:**

- 1/. Refuse to make any new investments in the top 200 publicly-traded fossil fuel companies.
- 2/. Divest from direct ownership and any commingled funds that include fossil fuel public equities and corporate bonds within 5 years.
- 3/. Make a public statement about when you are divesting from fossil fuel companies and why.

Unless the coal, oil and gas production currently in operation is retired early, emissions from existing projects will push global temperature rise past safe limits. This means new fossil fuel projects need to be stopped and we have to phase out existing ones.

By publicly divesting from fossil fuel companies you can send a clear message that you support national and international regulation of the fossil fuel industry to ensure these fossil fuels remain unburnt. Divestment also ensures that our pension fund does not risk being left with "stranded assets" - fossil fuel investments which instead of bringing a profit to the fund have become a financial liability.

Name	Email	Postcode	Do you have a pension with this fund (Leicestershire Local Government Pension Scheme)?	Would you like to receive updates about this pension fossil fuel divestment campaign?	Would you like to receive updates from Climate Action L & L?

Please return signatures to: Climate Action L+L, 52 Heyworth Rd, Leicester, LE3 2DB
