

Do you want to do something about climate change?

There are so many things you can do.

The climate crisis needs to be part of everyone's thoughts and conversation.

Talk – and keep talking - to your family, friends, and people you work with about how you feel, your hopes and fear on climate change. Advice on our website.

Show that you care - stand up with others at our climate vigils.

These are usually held at the Clock Tower in Leicester on the 2nd Monday, 12-1pm, and 4th Friday, 5-6pm, of each month. More info on the home page of our website.

Make changes to how you live which reduce your carbon footprint, and talk to people about what you are doing. There are ideas and links on the 'Pledge to act' page on our website.

Push national and local government to act:

- **Sign and share petitions** – there is a 'Petitions to sign' page on our website.
- **Write to your local councillors and MP** asking them for more and faster action. They need to hear that their own constituents care about this and why.
- **Respond to local and national consultations** which impact on climate change. Climate Action puts together briefings for local consultations – sign up for our emails.

Get involved in Climate Action Leicester and Leicestershire:

- Sign up for our email updates (roughly one every 2-4 weeks).
- Join one of our working groups via the get involved page on our website.

**What matters is that we act.
Together we can create positive change.**
